TRADING EXCITED WITH PRICES MOUNTING FAST

Steel Shares Were Accepted Leaders—Another Spectacular Skyward Run by Crucible

New York, Sept. 30.—There was another broad and buoyant bull market today in which the steel stocks took the leading part. While the days proceeded punctuated by periods of hesitancy and irregularity the entire industrial division exhibited almost an unrelenting upward trend. That is, as the last session was characterized by the upward surge, the reactionary party made frequent efforts to stem the tide but each time they were unsuccessful and were compelled to scramble for the stocks they had sold.

STORAGE AND ASPHALTS REACH NEW TOP NOTCHES

Apparently Fresh Accumulation of Storage Battery While Asphalt Mystery Is Still Unsolved

The local market developed quite a few unusual spots today with the Asphalts and Electric Storage Battery breaking into new high ground. The demonstrations in these two issues commanded widespread interest because of the unsolved mystery attending their remarkable movements.

OIL ISSUES LEAD TRADING ON CURB

Asphalts Again Sell at New High Records—Shell Transport and Trading in It Closely in Connection

New York, Sept. 30.—Most of the interest on the Broad street curb was attached to the buying of the petroleum issues, partly because of persistent accumulation of General Asphalt by Philadelphia interests, making both issues of that company sell at new high records.

TRADE ANIMATED IN WALL STREET Market Unwontedly Broad and Steel Plays Big Part in Transactions MONEY CONDITIONS IGNORED New York, Sept. 30.—The New York Evening Sun's closing financial review today says:

While the surge and oil issues enjoyed marked appreciation, and the motors and rubber tires stocks did very well, too, Brooklyn Rapid Transit shares were the most active.

Crucible Steel dashed forward to 248 early in the game, a new high and more than 17 points up. Lackawanna Steel gained 4 points, Bethlehem nearly 3, and American Locomotive, over 7, and American Locomotive, some 3 points.

It was past midday before this bumper day was pushed through in a steady rise, but United States Steel still lagged between 107 and 108. There is a very large short interest in Steel, but its equanimity was not easily disturbed.

The theory urged in explanation of this lethargy was that large supporting orders had been put in last week when the strike was in its initial stages, and that the strike seems to be petering out gradually, the toll has succeeded in natural course.
